

JAWS® CLEANING PRODUCT WINS COOKING CLUB OF AMERICA MEMBER TESTED & RECOMMENDED SEAL OF APPROVAL

Starter Kit Featured in October/November Issue of Cooking Club Magazine

October 15, 2009

Toledo, OH: The JAWS® Multi-Purpose Cleaner/Degreaser Starter Kit won the Cooking Club of America Member Tested & Recommended Seal of Approval, with a tester recommended rating of 85%. To win the seal, at least 67% of testers must recommend the product. The product test included 575 participants who rated JAWS®, an acronym for Just Add Water System, 7.5 (out of 10) or above in all categories, with highest ratings in Ease of Use/Preparation, Clarity of Instructions and Appearance and an overall rating average of 8.1. Each participant was asked to complete the survey and explain why they would recommend the product to fellow Club members; please see sample responses below.

Lacea DeGroot

“This product does exactly what it says: It cleans various surfaces easily. I like that it foams out of the spray bottle; you know where it is on the surface. It dries quickly and doesn’t streak. I used it on tile, stainless steel and laminate. I can’t wait to try it on the front of my washer and dryer.”

Elizabeth A. Grove

“I used this product on my toughest area to keep clean: the control panel on my stove. This product made quick work of removing the grease that builds up on the top and face of the control panel. It usually takes two different products to do what this product did with one application.”

Gretchen Hawkins

“This product is quickly becoming my new BFF! I use it in the kitchen, bathrooms and anywhere else I can think of. As a busy mom of two, I don’t always have time to scrub, but Jaws takes the bite out of housework.”

Nevada Huaute

“What a concept! It’s great not having to pay for (or store) all that water. The cartridge is great. It’s easy to use and easy to store. The cleaner is marvelous, especially since I know it’s safe and eco-smart too. I’m also glad that I can reuse the spray bottle. I’ve been wanting something like this for years. Three cheers that someone finally did it.”

Terri K. Jones

“I recommend this product very highly. Not only is it very effective on cleaning and as a degreaser, but using the refill cartridges helps save the environment by keeping unnecessary plastics that aren’t biodegradable out of our landfills. Finally!”

Dawn Kostreva

“This product is great. I used it on several cleaning projects, and it worked great on all of them. I spilled and splattered grease on my stove, and it wiped it off streak-free. I’ve never used a product that did this. I cleaned greasy fingerprints on the door to the garage, and Jaws took them off better and easier than anything else I’ve used—without taking the paint off. This is a great product.”

Jeana McLellan

“I can’t believe how this product outperformed every cleaning product I have in my house. It smells good, cleans without streaking and even cleans up baked-on/splashed gravy and other foods from the stovetop.”

Sherry Mudd

“This product’s performance as a cleaner was amazing. Other products have failed to remove a black scum ring around the bathtub, but Jaws easily removed it with little effort. The product didn’t leave a soapy residue behind, and it was very easy to rinse off.”

Shelby Rogers

“I used it on my range hood and stovetop. It cut through not only the grease but spaghetti sauce splatters. It left no residue on my appliances and didn’t dry out my skin (I don’t use gloves). The cartridges save on storage space for cleaning supplies.”

Susan Rowan

“Jaws is a wonderful product. I used it on my range hood, indoor grill and barbecue. It took the grease off of these items quickly and easily. I like that you mix it yourself with water, which is much more eco-friendly
